Diego Cera Organbuilders, Inc.

Our company was founded in 1994, based on training and experience derived from 6 years of study from Master Organ Craftsmen in Europe. We are based in Las Piñas, Philippines, home of the Bamboo Organ, of which we are curators.

Services Offered:

- Design and Construction of New Pipe Organs and Pipe-Electronic Combination Organs for Churches, Schools, Auditoriums and Residences.
- Restoration and Updating of Old Non-functioning Pipe Organs.
- Restoration and Reconstruction of Antique Pipe Organs with Strict Attention Paid to the Historical Significance of the Instrument
- Maintenance and Tuning of Pipe Organs

Since its founding, the company has built over 20 custom-made pipe organs for local and international clients as well. Our high quality instruments are a result of precision workmanship and high grade materials that are reasonably priced. In this part of the world, we can still provide affordable old-world craftsmanship and attention to detail, which is required in an instrument such as the Pipe Organ.

Other Services

- Authorized Organ Service Technicians and Installers of Ahlborn-Galanti, Rodgers, Allen and Wicks Organs
- Distributor of Nikolaus Damm Harpsichords (Germany)
- Repair and Restoration of Hammond Organs
- Tuning, Repair and Restoration of other Keyboard Instruments like:
 - Harpsichords
 - Reed Organs (Harmoniums)
 - Chimes

Member: International Society of Organbuilders (ISO)
Musical Instrument Technicians Association (MITA)
